Hi [REDACTED] I have done a few pre tasks so you can proceed with the EDA and Data cleaning workstream, please see below:

1) Folder structure for working files and output created. You are the owner and I'm editor. everyone else has reading permissions only on it.

Link:

https://drive.google.com/drive/folders/1SR0uCOJ1Acn9WsSfLcG08JsFZ9OV-IVL?usp=drive_link

2) I produced a pre-run design document with some of the pre-requisites and specifics I will need later on for the ML workstream, including some conventions on how we will exchange files, output, etc. and I have included some logging facilities too so I can see with run transparently.

Link:

https://docs.google.com/document/d/1fW_MTb22dWd-RUqLsgNUgCZDLB6g-E08/edit?usp=sharing&oid=113786110083556405902&rtpof=true&sd=true

3) A small script for data preparation as some special characters and indentation could get lost in the word document:

Links:

https://drive.google.com/file/d/1aoCap0f97ka5xJ5HWHILOJVwbYKcQVUP/view?usp=drive_link

Wish you best in this task and anything you need, clarifications, doubts or whether you just want to discuss findings just let me know and we can talk adhoc.

We are aiming to have this task completed by Saturday May 16th so I can pick up from there and begin the ML workstream.

Thanks !!

Ariel
